Able Like you II

Durée et période: à partir du 01/05/14 pour 9 mois

Frais de participation: 0 €

Hébergement: Dans la maison des volontaires de CESIE

Nombre de participants: 12 (3 français)

Présentation du projet:

ABLE LIKE YOU is an EVS project which will involve 24 volunteers divided in two groups of 9 months each coming from four European countries: Hungary, Austria, Spain, France. The volunteers will be involved in different centers that work with children and adults with physical and mental disorders.

ABLE LIKE YOU gives the opportunity to the volunteers and the organizations that are involved in it, to be part of a social learning process that will permit an inclusive society. Through formal and non-formal methodologies, the volunteers, with the help of the professional staff of the centers will carry indoor and outdoor activities ,so the people in the centers can become more active citizens and the volunteers will improve personally and professionally in order to improve their employment opportunities.

This project will give the opportunity to the 24 volunteers to contribute to the development of the local community in Palermo.

The objectives are:

- to promote the intercultural exchanges between volunteers and local community, facilitating intercultural dialogue and the abolishment of stereotypes,
- to facilitate each volunteer's personal and professional development through the acquisition of new skills and experiences,
- to create new educational tools and learning methods developing behavioral and social competencies of the target group, pursuing a social inclusion of the people in the centers,
- to promote community development active participation and the concept of citizenship through the presence of EVS volunteers at both EU and local level towards the 2011 European Year of Volunteering goals.

Lieu de la mission: Palermo, Italie

Rôle et des activités du volontaire:

- Work in the local centers and take care of disables in order to generate a relationship of trust with them and to professionalize.
- Organize artistic performances, artistic events and competitions using sports as a moment of social integration and to develop their hidden potentialities, develop motor and social skills, sensitize the local community.
- They will organize artistic performances such as expositions and theater performances, develop psychical potentialities, stimulate creativity ,express different perceptions and sensitize local community.
- They will also organize outdoor activities and they will participate in CESIE activities: active participation to intercultural events.

Profil des volontaires :

- Strong motivation and possible experience in working with people with disorders because the activities will be focused on disables and their families in order to take care of them and develop activities with them and for them.
- Interest and awareness of the themes of the project and the aims and objectives of the hosting organization because the EVS is a strong and interesting experience only if they

understand and share the aims of the project. Also because if they are aware about the project, they will learn and grow personally and professionally.

- Openness and interest in different cultures because we believe is very important that volunteers are open and motivated to work in an intercultural context.
- Motivation to learn a new language, Italian, because it is essential to become part of the local community.
- Good event management in sensitizing such as artistic exhibitions and sportive competitions for disables.
- Inclusion of young with fewer opportunities: We prefer to select volunteers with a high level of motivation but that may not have had the opportunity to experiment themselves in an intercultural context or that did not have the chance to study at higher level. This project is an occasion to develop their personal and professional skills, to learn more about themselves and to learn something that can help them in looking for a job. We would like to select 10 volunteers (half of the total number) with fewer opportunities (geographical, socio, cultural and economic difficulties) and create a mixed group so that the volunteers can exchange different realities and experiences between them therefore enriching each other.

Since the target group the volunteer will work with, and the strong emotional involvement that might arise, we would like the volunteers' motivation will be very strong.
